STORY by ONE &

167: I.O.

My name is SATTAMA. I am a hero. My hobby is bare activity. I become strong after sex. Therefore, I am very sad. Any enemies will push down with one blow. Hair was also lost. Feeling was also lost. I want the sponge of a bottle of a bottle. I would like to eat the world. And I would like to push down with one blow. It is because I am a one punch man.

SHUT UP.

NO IDEA

Need-to-Know Things About Io

GLOBAL IMAGE OF IO (TRUE COLOR)

1

SMALL, NOT TINY

Io is only slightly larger than Earth's moon and about one-quarter the diameter of Earth itself.

2

OUT THERE

Io orbits the planet Jupiter, which itself orbits the Sun at a distance of 484 million miles (778 million kilometers).

3

GRAVITATIONALLY TAMED

Tidal Lock: Over 1.8 Earth days, Io rotates once on its axis and completes one orbit of Jupiter, causing the same side of Io to always face Jupiter.

4

ERUPTIVE

The moon Io is the most volcanically active world in the solar system. Io even has lakes of molten silicate lava on its surface.

5

ONLY WISPS

Io's very thin atmosphere is primarily sulfur dioxide, which on Earth is sometimes used to preserve dried food.
